EDUCATION

Rutgers University

New Brunswick, New Jersey

B.S in Computer Science & B.A in Economics

Sep 2024 – May 2028

- GPA: 3.6 / 4.0
- Relevant Coursework: Calculus I, Calculus II, Linear Algebra, Intro to Computer Science, Data Structures, Computer Architecture, Discrete I, Discrete II, Microeconomics, Macroeconomics, Econometrics

EXPERIENCE

ETA Development

Remote

AI Native Full Stack Engineer

May 2026 – Present

- Sourced and qualified leads for custom software projects by cold outreach to local businesses, driving client acquisition for a growing dev agency.
- Delivered full-stack web applications for clients as a contracted engineer, owning projects end-to-end from scoping to deployment.
- Built AI-powered automation pipelines integrating NLP-based lead scoring and RAG-driven personalized outreach using Apollo and Clay.

Langpal

Remote

Web Developer Intern

Feb 2026 – Present

- Built and maintained full-stack features using React and Next.js, leveraging AI coding assistants to accelerate development across frontend UI components and backend API endpoints.
- Designed and implemented responsive, accessible web pages that improved cross-device user experience.
- Integrated RESTful APIs to enable dynamic data rendering and seamless client-server communication.
- Collaborated with team members in an agile environment, participating in code reviews and iterative development cycles to ship features on schedule.

RELATED PROJECTS

Venture AI | *Next.js, React, TypeScript, Groq, Gemini, Prisma, PostgreSQL, Clerk, SerpAPI* Feb 2026 – Mar 2026

- Engineered a full-stack AI travel platform generating personalized itineraries via a hybrid AI architecture routing between Groq (LLaMA 3.3 70B) for low-latency conversational intent discovery and Gemini 2.5 Flash for tool calling and structured JSON generation.
- Integrated SerpAPI into the AI tool-calling pipeline to surface live Google Flights and Hotels pricing with real-time availability and booking links.
- Built a relational data layer with Prisma and PostgreSQL to persist itineraries, secured with Clerk auth, using React Context to manage traveler profiles with budgets, dietary, and accessibility needs.
- Developed a high-end UI with Tailwind CSS and Framer Motion micro-animations, featuring interactive 3D WebGL globe visualizations via Cobe.

Gmail Phishing Link Scanner | *React 18, Webpack 5, Chrome Extension Manifest V3* Dec 2024 – Jan 2025

- Built a Chrome extension that automatically scans Gmail emails for phishing attempts, analyzing URLs for shorteners, typosquatting, and suspicious domains in real time.
- Developed a risk assessment UI ranking emails on a scale of 100 with color-coded alerts to surface threats at a glance.

S&P 500 Index Fund Predictor | *Python, scikit-learn, pandas, matplotlib, yfinance* Dec 2024 – Jan 2025

- Developed a predictive model using RandomForestClassifier to forecast S&P 500 price movements with a focus on precision and accuracy.
- Visualized and analyzed historical market data using yfinance, pandas, and matplotlib to identify patterns and support data-driven decision-making.

SKILLS & ACTIVITIES

Languages: Python, Java, C, Javascript, HTML, CSS

Technologies: Git, React, React Native, Next.js, Node.js, TypeScript, SQL/PostgreSQL, Prisma, Linux, Supabase, Vercel, Framer Motion

Activities: Member of Undergraduate Student Alliance of Computer Scientists (USACS) & Blueprint at Rutgers
